# About Us

---

AJ Infra Contracting LLC is a leading infrastructure solutions provider based in Dubai, UAE. We specialize in delivering end-to-end project services, covering every stage from concept development and approvals to execution and final commissioning.

With a strong focus on reliability, sustainability, and innovation, our team handles feasibility studies, initial site works, strategic partner coordination, and seamless implementation across various infrastructure and utility projects. Whether it's dewatering, sewerage networks, house connections, or pump system installations, AJ Infra delivers quality-driven solutions tailored to meet the evolving needs of the region.

# Vision & Mission

---

**Vision :**

*To be a driving force in sustainable infrastructure development across the UAE and beyond — creating resilient, future-ready communities and improving quality of life.*

**Mission :**

*To deliver innovative, efficient, and environmentally responsible infrastructure solutions that exceed client expectations and contribute to long-term societal progress.*

# Values

---

**Our Core Values:**

- *Innovation:* We embrace emerging technologies and smarter ways of working.
- *Integrity:* We build trust through transparency and ethical practices.
- *Collaboration:* We work closely with clients, partners, and communities.
- *Excellence:* We are committed to delivering high-quality results, on time and on budget.
- *Sustainability:* We prioritize eco-friendly practices in every project we undertake.

# Company Goals

---

## Our Goals:

At AJ Infra Contracting LLC, our goals are built around delivering real value to our clients, our team, and the communities we serve.

- **Smarter Infrastructure Tailored to Local Requirements**

We aim to deliver projects that are durable, cost-effective, and tailored to local needs — from dewatering systems to full sewerage networks.

- **Focus on Innovation**

We continuously adopt new technologies and efficient methods to improve speed, safety, and quality on every site.

- **Exceed Client Expectations**

We believe in proactive communication, on-time delivery, and long-term partnerships built on trust.

- **Empower Our People**

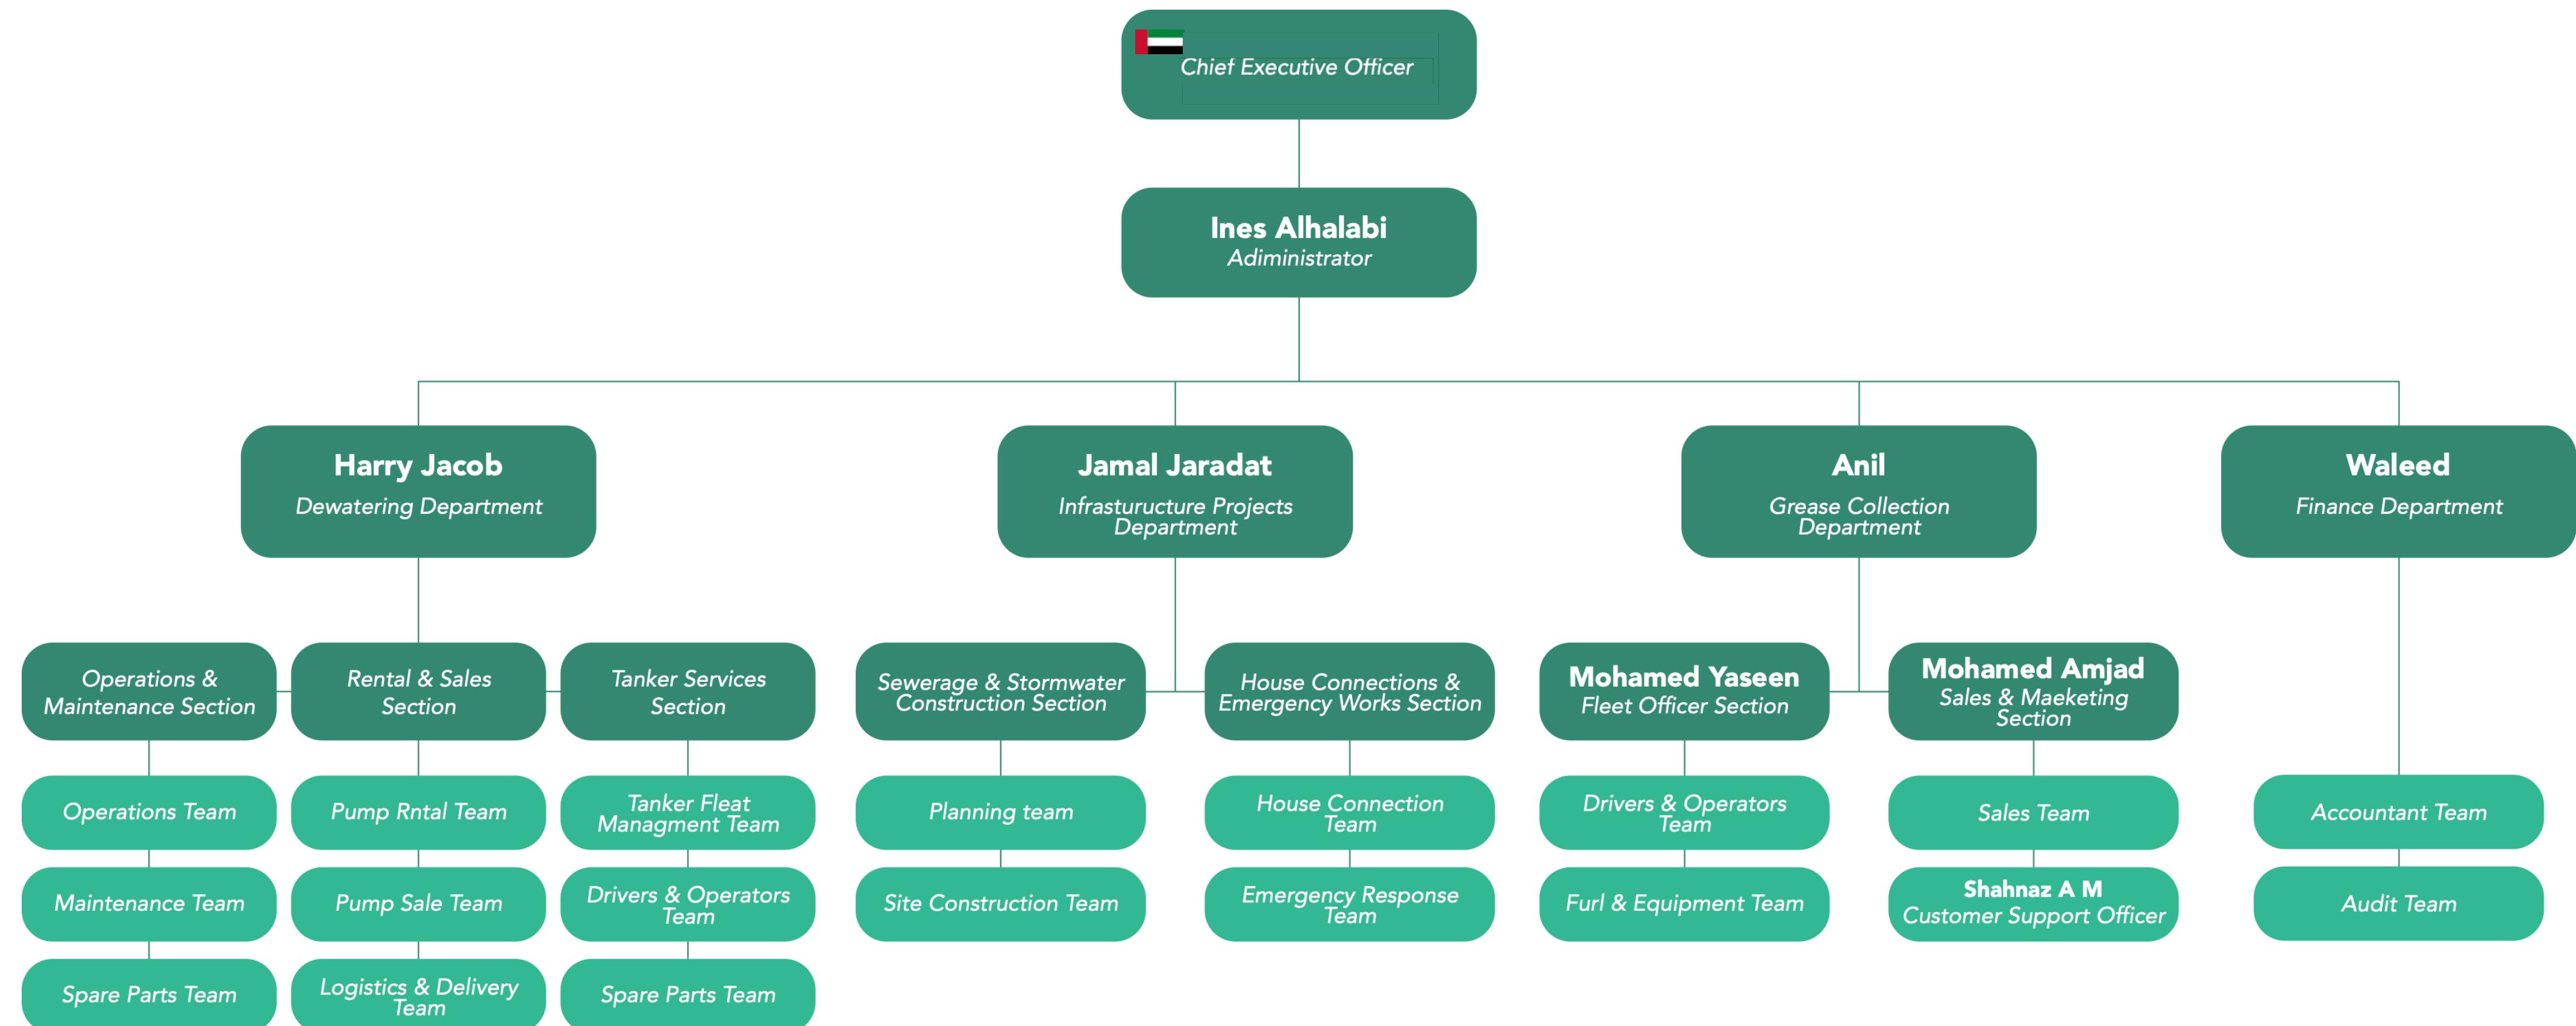

Our team is our strength. We invest in their growth, skills, and safety so they can deliver their best.

- **Sustainable Growth**

We aim to expand our services while maintaining high environmental standards and strong compliance across all operations.

These goals guide how we work every day — with integrity, purpose, and a focus on results.

# Organization Chart

# Services

---

## Trading Services :

---

Our trading division supports infrastructure works with high-performance equipment from globally trusted brands:

### Dewatering & Tankers Services

---

Comprehensive site dewatering, stormwater removal, and lake level control using high-capacity pumps and vacuum tankers..

### Pumps

---

Submersible, centrifugal, and diesel-driven pumps suitable for dewatering, sewage, irrigation, and industrial applications — including exclusive distribution of Pioneer Pump systems in the UAE.

### Valves

---

Industrial-grade gate, globe, check, and butterfly valves for water, wastewater, and oil & gas networks — precision-engineered for durability and performance.

# Pioneer Pumps

AJ Infra is proud to represent as the exclusive distributor of Pioneer pumps in UAE specifically to cater the municipal sector. Pioneer pump is part of Franklin electric.

Pioneer pumps plays a crucial role whether it may be the municipal pumping stations, stormwater pumping, flood control, dewatering sector, sewage pumping and irrigation pumping. Our pumps are be durable and reliable to provide consistent operation in lift stations, sewage, and water treatment applications.

## ELECTRIC PACKAGE

*The Pioneer Pump® ElectricPAK™ delivers more than just a modular design that can arrive on-site & startup quickly. It's also engineered from the ground up to offer a fully streamlined experience for both owners & operators. From initial selection, to installation, to a lifetime of operation: durability and performance are built into every component. Each configured assembly includes high-performance pumps & electric motors that provide better flow, higher head & greater efficiency.*

## DIESEL-DRIVEN PACKAGES

*Heavy-duty pump packages designed for high pressure and high flow applications, providing outstanding suction lift and adaptability across performance ranges. Our comprehensive range of diesel-driven pump packages include options for fixed and portable installations. These packages are built for the toughest environments and are available with vacuum-assisted priming, self-priming and standard centrifugal pump ends.*

*Available in sizes up to 18".*

# Services

## Engineering Services :

We offer full-scope infrastructure construction services designed to support urban development and environmental sustainability:

### Sewerage Network & House Connections

Construction of underground networks and house connections from the Final Inspection Chamber (FIC) to the main municipal system, in full compliance with Dubai Municipality standards.

### Pre-cast Manholes & Chambers

Supply and installation of high-quality precast concrete units for faster deployment and reduced site work.

### Overpumping Solutions

Temporary pumping setups for stormwater & sewage bypass during maintenance or emergencies.

### Pump Stations

Design, build, and operate small to large-scale pumping stations for sewage, stormwater, irrigation, and potable water systems.

### Emergency Works

On-call support for flooding, overflows, and network failures — including deployment of mobile equipment and technicians.

### Grease Trap Cleaning Services

- Grease Trap Cleaning & Maintenance.
- Scheduled Preventive Maintenance.
- Emergency Cleaning Services.

# Why Choose us

At AJ INFRA CONTRACTING L.L.C, we specialize in professional grease trap cleaning to keep your business compliant, efficient, and environmentally responsible.

## Working with us -

1. *Experienced Team: Trained professionals ensuring top-quality service*
2. *Always On Time: Punctuality is our promise*
3. *Advanced Equipment: State-of-the-art vacuum tankers & cleaning tools*
4. *Regulatory Compliance: Fully licensed and compliant with Dubai Municipality standards*

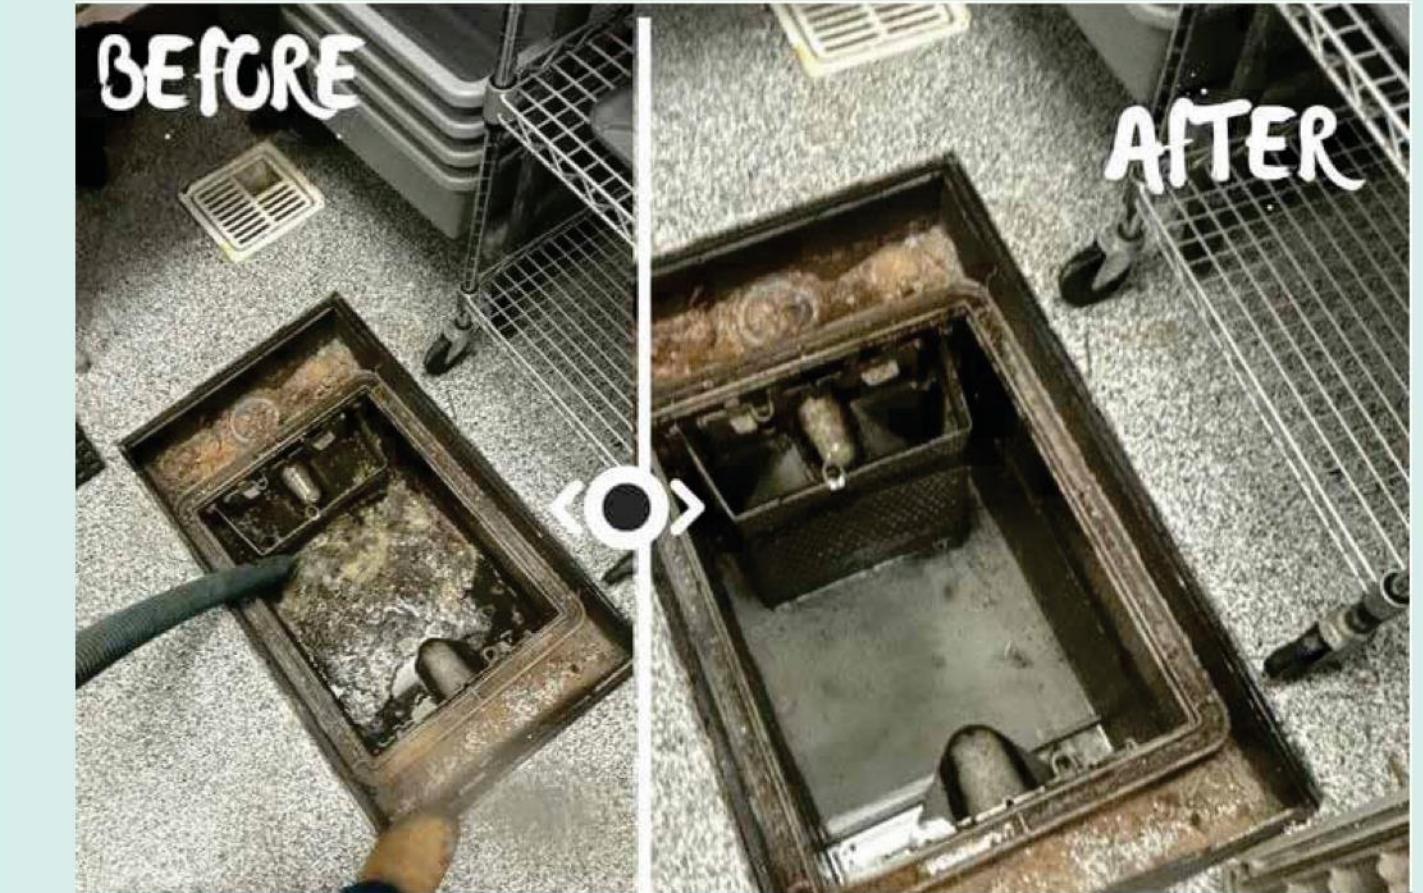

# What We Offer

1. **Grease Trap Cleaning & Maintenance:**
  - Complete grease, sludge, and food waste removal
  - High-pressure cleaning for peak performance
  - Effective Odor control solutions
2. **Emergency Cleaning Services:**
  - 24/7 rapid response to prevent blockages and overflows
3. **Scheduled Preventive Maintenance**
  - Tailored cleaning schedules to minimize costs
  - Enhances efficiency, hygiene, and reduces repairs

# Who We Serve?

- Restaurants & Cafes
- Hotels & Resorts
- Commercial Kitchens
- Accommodations
- Food Processing Facilities

NAEL CONSTRUCTION & CONTRACTING

# Construction of Sewerage & Stormwater System

## Project 1 in Al Aweer Area

### Challenge:

The area required a fully integrated sewer and stormwater network to support rapid urban growth and mitigate seasonal flooding.

### Solution:

Supplied and installed 20,000 meters of UPVC pipes (160mm & 200mm) at depths up to 2.5 meters, including final inspection chambers (FICs) for house connections.

### Outcome:

Enhanced sanitation, improved flood protection, and sustainable infrastructure development in Al Aweer.

# Supply & Install HDPE Pipes

## Project 2 – Dubai Airport Road and Mirdif Area

### Challenge:

Critical need for emergency drainage to prevent surface water accumulation in the airport Road and Mirdif Area.

### Solution:

Installed 2,000 meters of HDPE pipelines (400mm & 630mm) above ground using precision welding and engineered fittings.

### Outcome:

Improved stormwater handling and operational reliability at airports road.

# Stormwater Management by Dewatering System

Project 3 in Zabeel, Jumeirah, Al Quoz, Al Barsha, Oud Al Muteena and Mirdif Area

## Challenge:

Multiple community areas experienced severe rainwater pooling during peak rainfall.

## Solution:

Deployed mobile dewatering units and bypass pumping systems to extract and redirect excess stormwater.

## Outcome:

Minimized flooding risk, restored safe access in public areas, and protected infrastructure during extreme weather.

# Supply & Install HDPE Lining system

## Project 4 in Al Qudra Area

### Challenge:

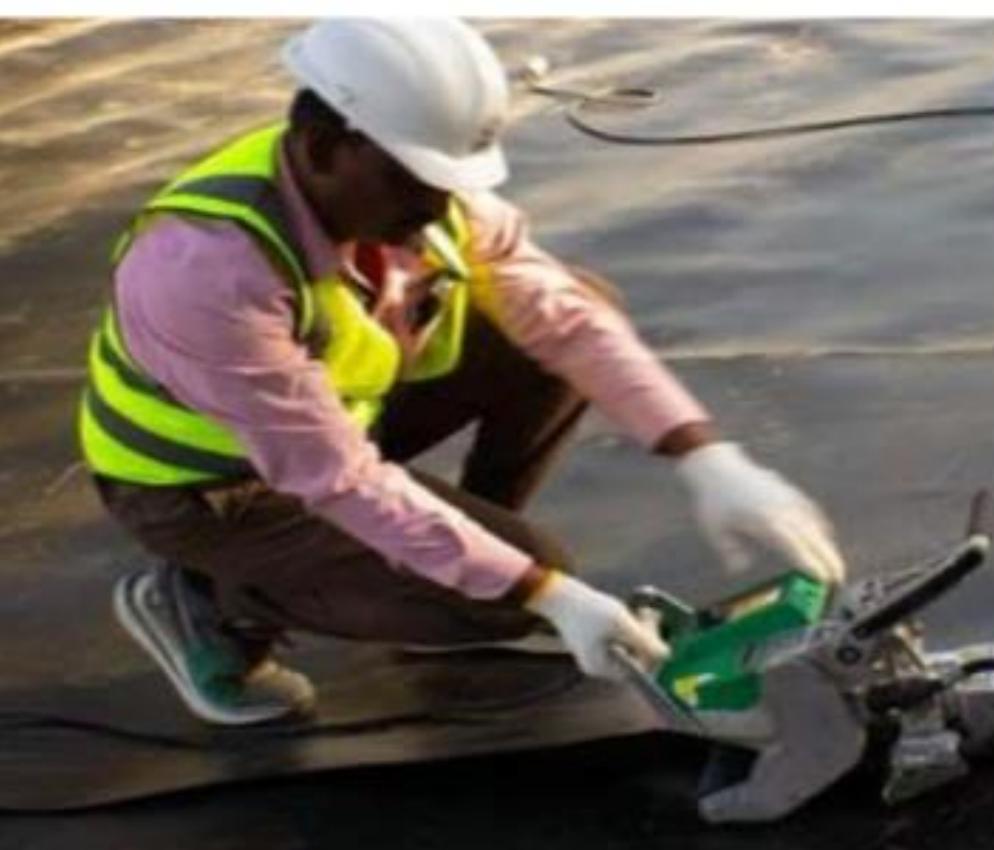

Required water retention improvement and long-term lining integrity for artificial lakes in desert environment.

### Solution:

Supplied and installed 50,000 m<sup>2</sup> of HDPE lining system for Lake 10 to ensure minimal leakage and maximum durability.

### Outcome:

Achieved long-lasting containment with low maintenance, supporting environmental and recreational goals.

# Tankers & Dewatering Services

## Project 5 in Jumeirah, Al Quoz, Mirdif and Emirates Road

### Challenge:

Multiple rainwater buildup sites across Dubai including Jumeirah, Al Quoz, Mirdif, and Emirates Road.

### Solution:

Executed 14+ dewatering operations between Nov 2023 – May 2024 using high-capacity pumps and tanker fleets.

### Outcome:

Rapid response prevented urban flooding and ensured uninterrupted traffic and access.

# Supply 12" Pioneer Diesel Driven Pump

## Project 6 Supplied To Abu Dhabi Sustainable Water Solution Company (TAQA)

### Challenge:

High-volume water transfer needed with strict specifications.

### Solution:

Supplied 10 sets of 12" Pioneer diesel-driven pumps with enclosed and open skid assemblies, each equipped with Siemens 12" magnetic flowmeters.

### Outcome:

Delivered reliable, efficient pump systems for industrial-scale water movement with precise flow monitoring.

# QHSE

## *A Culture of Safety and Sustainability*

At AJ Infra, we maintain the highest standards in Quality, Health, Safety, and Environment (QHSE) across all operations. Our teams are trained, equipped, and empowered to work safely, efficiently, and responsibly.

### Our Commitments

#### Workforce Safety:

Regular safety training, on-site inspections, and emergency preparedness programs to protect all staff and partners.

#### Environmental Responsibility:

We use eco-friendly materials, minimize waste, and implement energy-efficient solutions to reduce our carbon footprint.

#### Quality Control:

Strict compliance with Dubai Municipality guidelines and international standards. We follow detailed checklists and documentation for every project stage.

Engineering Solutions, Constructing Success

# Safety & Compliance

#### Community Protection:

Safe working zones, dust suppression, noise control, and timely public communication to reduce disruption and maintain public safety.

QHSE is at the core of our operations — not only to meet regulations, but to deliver better, safer infrastructure for everyone.
